Postpaid Plan Guidelines

Category B — Policy & Process Knowledge Base

Document ID	AW-PLN-001
Version	3.0
Last Updated	August 2026
Department	Consumer Plans
Company	Aether Wireless
Classification	Internal — Training & Reference

Overview

Aether Wireless postpaid plans provide flexible mobile service options designed to meet diverse customer needs across consumer, family, business, and senior segments. This knowledge base outlines the complete catalog of postpaid plans, their features, policies, and associated guidelines to ensure consistent service delivery and customer satisfaction.

All postpaid plans operate on a monthly billing cycle with automatic renewal unless cancelled according to established policies. Plans include domestic talk, text, and data services with specific allowances and overage behaviors defined per plan tier. International services, device financing, and additional features are managed through separate policies and add-ons.

Plan Catalog Overview

Aether Wireless offers seven distinct postpaid plan categories, each designed for specific customer segments and usage patterns. The plan structure ranges from entry-level essential services to comprehensive business solutions with pooled data resources.

Plan Categories and Pricing Structure

Essential Plan - \$40/month

- 5GB data allowance
- 500 domestic minutes
- 500 domestic SMS messages
- Target audience: Light users, secondary lines, budget-conscious customers

Standard Plan - \$60/month

- 20GB data allowance
- 1000 domestic minutes
- 1000 domestic SMS messages
- Target audience: Moderate users, single-line customers

Premium Plan - \$80/month

- 50GB data allowance
- Unlimited domestic minutes
- Unlimited domestic SMS messages
- Target audience: Heavy data users, power customers

Family Plan - \$120/month

- 100GB shared data pool
- Base price includes 2 lines
- Additional lines: \$30/month each
- Target audience: Multi-line households

Unlimited Plan - \$90/month

- Unlimited data with deprioritization after threshold
- Unlimited domestic minutes and SMS
- Target audience: Customers requiring unlimited services

Business Plan - \$200/month

- 200GB pooled data per 5 lines
- Additional lines: \$40/month each
- Target audience: Small to medium businesses

Senior Plan (65+) - \$30/month

- 10GB data allowance
- 500 domestic minutes
- 500 domestic SMS messages
- Target audience: Customers aged 65 and older

Data Overage Behavior Matrix

Plan Type	Overage Action	Throttle Speed	Notes
Essential	Throttle	128 kbps	Reduced speed after data exhaustion
Senior (65+)	Throttle	128 kbps	Same throttling as Essential
Standard	Throttle	256 kbps	Moderate throttling for moderate users
Family	Throttle	256 kbps	Shared pool throttling applies
Premium	Throttle	512 kbps	Higher throttling speed for premium customers
Business	Throttle	1 Mbps	Highest throttling speed for business users
Unlimited	Deprioritize	Variable	Network-dependent prioritization after threshold

Features Matrix

Feature	Essential	Standard	Premium	Family	Unlimited	Business	Senior
Domestic Talk	✓	✓	✓	✓	✓	✓	✓
Domestic Text	✓	✓	✓	✓	✓	✓	✓

Visual Voicemail	✓	✓	✓	✓	✓	✓	✓
Call Forwarding	✓	✓	✓	✓	✓	✓	✓
Spam Blocking	✓	✓	✓	✓	✓	✓	✓

Consumer Plans: Essential

The Essential plan represents Aether Wireless's entry-level postpaid offering, designed for customers with light to moderate usage patterns who require reliable mobile service without premium features. This plan provides a balanced combination of talk, text, and data services at an accessible price point.

Plan Specifications

Monthly Service Cost: \$40/month

Data Allowance: 5GB high-speed data per billing cycle

Talk Allowance: 500 domestic minutes per billing cycle

Text Allowance: 500 domestic SMS messages per billing cycle

Data Usage and Overage Policy

Essential plan customers receive 5GB of high-speed data each billing cycle. Once the data allowance is exhausted, service continues with throttled speeds at 128 kbps. This throttled speed allows for basic web browsing, email checking, and messaging but may not support high-bandwidth activities such as video streaming or large file downloads.

The throttled connection remains active until the end of the current billing cycle, at which point the full data allowance resets. Customers may monitor their data usage through the Aether Wireless mobile app or customer portal to avoid unexpected throttling.

Talk and Text Services

The Essential plan includes 500 domestic minutes for voice calls and 500 domestic SMS messages per billing cycle. Domestic calls include calls to mobile and landline numbers within the United States, including Alaska and Hawaii. International calling is not included in the base plan but can be added through international calling add-ons.

SMS messages sent to domestic numbers are included in the 500-message allowance. Picture messages (MMS) count toward both the text and data allowances. Premium SMS services, such as those used for purchases or subscriptions, may incur additional charges beyond the base plan allowance.

Included Features

Essential plan customers receive the following standard features:

- Mobile hotspot capability with data counting toward the 5GB allowance
- Wi-Fi calling for enhanced indoor coverage
- Visual voicemail with standard storage limits
- Call forwarding functionality
- Basic spam blocking and caller ID services
- Access to Aether Wireless nationwide 5G and 4G LTE networks

Plan Limitations

The Essential plan does not include priority network access, which means customers may experience reduced speeds during network congestion compared to Premium, Family, Unlimited, and Business plan customers. International roaming is not included and requires separate travel add-ons for use outside the United States.

Device Financing Compatibility

The Essential plan can be combined with Aether Wireless device financing programs without affecting installment payments. Customers may purchase devices on installment plans while maintaining their Essential plan service. Plan changes do not impact existing device financing agreements.

Upgrade and Downgrade Policies

Essential plan customers may upgrade to higher-tier plans at any time with immediate effect and prorated billing adjustments. Downgrades take effect at the beginning of the next billing cycle to ensure customers receive full value for their current plan period.

A 14-day cooling-off period applies to plan changes, during which customers may revert to their previous plan without penalty. This policy helps customers make informed decisions about their service needs and prevents frequent plan switching.

Add-On Services

Essential plan customers can enhance their service with various add-ons:

- Data sharing add-on: \$10/month for additional data sharing capabilities
- International calling packages: Available with varying rates and coverage areas
- Travel add-ons: \$15/day for international roaming services
- Additional hotspot data: Available for purchase in various increments

Target Customer Profile

The Essential plan is ideal for:

- Customers with light to moderate smartphone usage
- Secondary lines for family members with minimal data needs
- Budget-conscious customers seeking reliable mobile service
- Users who primarily connect to Wi-Fi networks for data-intensive activities
- Customers who make occasional voice calls and send basic text messages

Network Performance Expectations

Essential plan customers can expect:

- Full network speeds (up to device and network capabilities) within the 5GB data allowance
- Consistent 128 kbps throttled speeds after data exhaustion
- Standard network priority during non-congested periods
- Access to Aether Wireless 5G and 4G LTE coverage areas
- Roaming capabilities on partner networks where available

Customer Support and Account Management

Essential plan customers have access to:

- 24/7 customer service through phone, chat, and online channels
- Self-service account management via mobile app and web portal
- Usage monitoring and billing transparency tools
- Plan comparison tools for potential upgrades
- Educational resources for optimizing mobile service usage

Consumer Plans: Standard

The Standard plan represents Aether Wireless's mid-tier postpaid option, designed for moderate users who require more data and voice allowance than the Essential tier while maintaining predictable monthly costs. At \$60 per month, the Standard plan provides 20GB of monthly data, 1,000 minutes of voice calls, and 1,000 SMS messages. This allocation suits individual users with regular smartphone usage patterns including streaming, social media, email, and moderate video calls.

Data Allowance and Overage Behavior

The Standard plan includes 20GB of high-speed data per billing cycle. When the data allowance is exhausted, the service continues without interruption; however, the connection speed is throttled to 256 kilobits per second (kbps) until the next billing cycle begins. This throttled speed remains functional for basic web browsing, email, and messaging applications, though high-bandwidth activities such as HD video streaming or large file downloads may experience significant delays. Users approaching their data limit receive proactive notifications at 75% and 90% consumption thresholds via SMS and the MyAether app. The throttled speed applies exclusively to mobile data; voice calls and SMS messages remain unlimited and unaffected by data overage.

Features Matrix

The Standard plan includes a comprehensive feature set designed to enhance the user experience:

- **Talk and Text:** Unlimited domestic voice minutes and 1,000 SMS messages per month. Additional SMS messages are charged at standard rates if the allocation is exceeded.
- **Mobile Hotspot:** Hotspot capability is included, allowing the user to share their data connection with other devices. The hotspot data draws from the 20GB monthly allowance.
- **International Calling:** The plan includes 100 international calling minutes to select countries. Users may purchase additional international add-on minutes at competitive per-minute rates.
- **Wi-Fi Calling:** Built-in Wi-Fi calling enables voice and SMS functionality over Wi-Fi networks, useful for coverage-challenged areas and international travel where Wi-Fi is available.
- **Priority Network Access:** Standard plan subscribers receive standard priority handling on the Aether Wireless network, with typical access during peak periods.
- **Voicemail:** Visual voicemail is included with standard storage capacity for up to 20 messages.
- **Call Forwarding:** Conditional and unconditional call forwarding is available at no additional charge.
- **Spam Blocking:** Basic spam call blocking is enabled by default, with advanced blocking options available through the MyAether app.

Plan Change Policies

Subscribers may modify their plan selection according to the following guidelines:

- **Downgrade to Lower Tier:** Plan downgrades take effect at the start of the next billing cycle. The current cycle continues at the existing rate, and the new lower rate applies from the subsequent cycle forward. Downgrades do not trigger prorated refunds.
- **Upgrade to Higher Tier:** Upgrades take effect immediately upon confirmation. The subscriber is charged a prorated amount reflecting the unused portion of the current billing cycle at the new plan rate, plus the full new plan rate for the remainder of the cycle. The new data allowance becomes available immediately.
- **14-Day Cooling-Off Period:** After any plan change, subscribers have 14 calendar days to revert to their previous plan configuration without penalty. The revert takes effect at the start of the next billing cycle. Only one reversion is permitted per billing cycle under this policy.
- **Device Installments:** Plan changes do not affect existing device installment agreements. Monthly installment payments continue as scheduled regardless of plan tier changes.

Promotional Pricing

Promotional discounts on the Standard plan are subject to the following terms:

- Promotional pricing is applied on a per-account basis, not per line.
- A maximum of two promotional discounts may be applied to any single account at any time.
- When a promotional period approaches expiration, Aether Wireless provides notice at least 30 days prior to the expiration date via SMS, email, and the MyAether app.
- Upon promotional expiry, the standard rate for the applicable plan tier takes effect automatically.
- Promotional discounts cannot be combined with employee discounts or partner corporate rates.

Add-On Services and FAQs

Data Sharing Add-On: Standard plan subscribers may add shared data to their account for \$10 per month. This add-on provides an additional 5GB of data that can be allocated across secondary lines on Family or shared plans. The shared data pool expires at the end of each billing cycle if unused.

Travel Add-On: For international travel, subscribers may purchase the Travel Pass add-on at \$15 per day. This add-on provides unlimited data, voice, and SMS while traveling in over 200 countries. The daily rate is charged only on days when the device is used internationally. Users must activate the Travel Pass prior to departure or while abroad through the MyAether app.

Frequently Asked Questions:

- **Can I roll over unused data to the next month?** No. Unused data from the 20GB allowance does not roll over and expires at the end of each billing cycle.
- **What happens if I exceed my 1,000 SMS messages?** Additional SMS messages are charged at \$0.20 per message for domestic numbers.
- **Is 5G included with the Standard plan?** Yes, the Standard plan includes access to Aether Wireless 5G and 5G Plus networks where available.
- **Can I add more hotspot data?** Yes, additional hotspot data blocks of 5GB can be added for \$10 per block.

Consumer Plans: Premium

The Premium plan serves power users who demand substantial data allowances and premium network features. Priced at \$80 per month, the Premium plan provides 50GB of high-speed data with unlimited voice minutes and unlimited SMS messaging. This tier is optimized for users who stream high-definition video, engage in frequent video conferencing, or use their smartphone as a primary internet connection.

Data Allowance and Overage Behavior

The Premium plan includes 50GB of premium high-speed data per billing cycle. Upon exhausting the data allowance, subscribers continue to receive data service without interruption; however, speeds are reduced to 512 kilobits per second (kbps). This throttled speed accommodates standard-definition video streaming, video calls, web browsing, and most social media applications. Users receive usage alerts at 75% and 90% thresholds through their preferred communication channel. The deprioritization applies to data traffic only; voice and messaging services remain fully functional regardless of data usage.

Features Matrix

The Premium plan delivers an enhanced feature set with premium components:

- **Talk and Text:** Unlimited domestic voice minutes and unlimited SMS messages. No overage charges apply for voice or messaging.
- **Mobile Hotspot:** Full mobile hotspot functionality is included, with the ability to create a Wi-Fi network for nearby devices. Hotspot usage counts against the 50GB monthly data allowance.
- **International Calling:** The Premium plan includes 200 international calling minutes to a broader selection of countries compared to the Standard tier. Additional international minutes are available at discounted rates.
- **Wi-Fi Calling:** Enhanced Wi-Fi calling with higher audio quality and seamless handoff between Wi-Fi and cellular networks.
- **Priority Network Access:** Premium subscribers receive priority network access, providing preferential handling during congestion events and faster connection times in high-traffic areas.
- **Voicemail:** Premium visual voicemail with extended storage for up to 40 messages and transcription services.
- **Call Forwarding:** Full call forwarding capabilities including simultaneous ring, sequential ring, and custom routing rules.

- **Spam Blocking:** Advanced spam blocking with spam risk screening and unwanted call labeling.

Plan Change Policies

- **Downgrade to Lower Tier:** Downgrades take effect at the start of the next billing cycle. The Premium rate continues through the current cycle, and the new tier rate applies from the subsequent cycle.
- **Upgrade to Higher Tier:** Upgrades are processed immediately with prorated billing. The new plan's data allowance becomes available instantly upon confirmation.
- **14-Day Cooling-Off Period:** The cooling-off policy permits one reversion to a previous plan configuration within 14 days of any change, effective at the start of the next billing cycle.
- **Device Installments:** Device payment plans remain unchanged regardless of plan modifications.

Promotional Pricing

- Promotional discounts are applied per account, not per line.
- Accounts may receive a maximum of two promotional discounts simultaneously.
- A minimum 30-day advance notice is provided before any promotional rate expires.
- Standard rates apply automatically following promotional periods.
- Promotional offers cannot be stacked with employee or partner corporate discounts.

Add-On Services and FAQs

Data Sharing Add-On: Premium subscribers may add data sharing for \$10 per month, providing 5GB of pooled data for secondary lines.

Travel Add-On: The Travel Pass at \$15 per day provides comprehensive international coverage including unlimited data, voice, and SMS in over 200 destinations. Activation is available through the MyAether app.

Frequently Asked Questions:

- **Does the Premium plan include 5G Ultra?** Yes, Premium subscribers have access to Aether Wireless 5G Ultra in all coverage areas.
- **What is priority network access?** Priority access means Premium users receive preferential bandwidth allocation during network congestion, resulting in more consistent speeds in high-demand locations.
- **Can I use mobile hotspot at full speed after hitting 50GB?** No, hotspot data is subject to the same throttling behavior as all data usage once the 50GB allowance is exhausted.
- **Is international roaming included?** International roaming is not included; the Travel Pass add-on provides international coverage on a daily basis.
- **Can I upgrade to Premium from Essential mid-cycle?** Yes, upgrades take effect immediately with appropriate proration applied to the current billing cycle.

Consumer Plans: Unlimited

The Unlimited plan represents Aether Wireless's flagship consumer offering, providing truly unlimited data without hard caps or throttling for eligible users. Priced at \$90 per month, the Unlimited plan delivers unlimited high-speed data, unlimited voice minutes, and unlimited SMS messages. This tier is designed for heavy users who require consistent, unrestricted data access for streaming, gaming, remote work, and continuous

connectivity.

Data Allowance and Overage Behavior

The Unlimited plan distinguishes itself through its truly unlimited data model. Subscribers receive unlimited high-speed data throughout each billing cycle without encountering a hard data cap. However, during periods of network congestion, Unlimited plan subscribers may experience data deprioritization. This means that when the Aether Wireless network experiences high traffic volumes, Unlimited users may have their data speeds temporarily reduced to ensure fair resource allocation among all subscribers. Deprioritization typically occurs during peak usage hours in highly congested areas and is lifted as network demand normalizes. Unlike throttling, deprioritization is variable and not a permanent speed reduction. Voice calls and SMS messages are never affected by deprioritization or any data-related policies.

Features Matrix

The Unlimited plan provides the complete Aether Wireless feature suite:

- **Talk and Text:** Truly unlimited domestic voice minutes and unlimited SMS messages. No caps, overages, or restrictions apply.
- **Mobile Hotspot:** Unlimited mobile hotspot is included, allowing users to share their connection with other devices without worrying about data consumption limits.
- **International Calling:** The Unlimited plan includes 500 international calling minutes to an extensive list of countries. Additional minutes are available at favorable per-minute rates.
- **Wi-Fi Calling:** Premium Wi-Fi calling with high-definition audio, seamless network switching, and international Wi-Fi calling capability.
- **Priority Network Access:** Unlimited subscribers receive top-tier priority access, providing the highest level of network preference during congestion events.
- **Voicemail:** Premium visual voicemail with unlimited message storage, transcription, and advanced organization features.
- **Call Forwarding:** Complete call forwarding suite including simultaneous ring, find me follow me, and custom routing.
- ****Spam**

Family Plans

Overview and Pricing

The Aether Wireless Family Plan is designed for households with multiple lines that want to share a single data pool while enjoying comprehensive wireless services. The base Family Plan provides 100GB of shared data per month for the primary account holder and includes service for two lines at a base price of \$120 per billing cycle. Additional lines beyond the initial two can be added at a cost of \$30 per line per month. This structure allows families to scale their service according to their needs, whether they have two members or several dependents requiring connectivity.

The shared data model means that all lines on the Family Plan draw from the same 100GB monthly allowance. This approach is particularly beneficial for families where data usage patterns vary significantly month-to-month, as unused data does not roll over but the collective pool provides flexibility for heavier users alongside lighter users. Accounts with more than two lines will see their total monthly cost calculated as \$120 plus \$30 multiplied

by the number of additional lines beyond two.

Data Allowance and Overage Behavior

Family Plans include 100GB of shared high-speed data each billing cycle. Once the combined data usage across all lines reaches the 100GB threshold, the account enters a throttled data mode rather than incurring overage charges. The throttled speed for Family Plans is set at 256kbps, which remains sufficient for basic web browsing, email, and messaging applications though it will noticeably reduce performance for video streaming, video calls, and other bandwidth-intensive activities.

The throttle applies to the entire account collectively rather than to individual lines. When the shared pool is exhausted, all lines on the account experience the reduced speeds until the next billing cycle begins. Customers on the Family Plan do not have the option to purchase additional high-speed data top-ups; the throttled period persists until the new billing cycle resets the allowance. This policy encourages families to monitor their collective usage and adjust consumption patterns if they consistently exceed the 100GB threshold.

Features Matrix

The Family Plan includes the full suite of Aether Wireless standard features designed to meet the communication and connectivity needs of modern households.

Feature	Availability
Unlimited Talk	Included
Unlimited Text (SMS/MMS)	Included
Mobile Hotspot	Included (shared data allowance)
International Calling	Included to select countries
Wi-Fi Calling	Included
Priority Network Access	Included
Visual Voicemail	Included
Call Forwarding	Included
Spam Blocking	Included

The mobile hotspot capability allows any line on the Family Plan to function as a Wi-Fi hotspot for other devices, with the data consumed counting against the shared 100GB pool. International calling is included to a selection of countries, and customers should consult the international calling destinations list to confirm coverage for their specific needs. Wi-Fi Calling enables calls and texts to be made over Wi-Fi networks when cellular coverage is limited, which is particularly useful in rural areas or buildings with challenging cellular reception.

Change Policies

Plan modifications for Family Plans follow the standard Aether Wireless change policies applicable to all postpaid customers. Downgrades to a lower-tier plan take effect at the start of the next billing cycle, allowing customers to complete their current cycle before transitioning to the new plan. Upgrades to a higher-tier plan take effect immediately with prorated billing, meaning customers pay only for the remaining days in their current billing cycle at the new plan rate plus the full amount for the next cycle.

A 14-day cooling-off period applies to all plan changes, during which customers may reverse their decision and return to their previous plan configuration without penalty. This policy provides a safety net for customers who upgrade and find the new plan does not meet their expectations or who downgrade and discover their needs

have changed. Importantly, plan changes do not affect existing device installment agreements; customers continue their device payment schedules regardless of plan upgrades, downgrades, or other modifications.

Promotional Pricing

Promotional pricing on Family Plans is applied on a per-account basis, with each account eligible to receive up to two promotional discounts simultaneously. These promotions may include discounted monthly rates, waived activation fees, or bonus data offers. Promotional pricing carries a 30-day expiry notice, meaning customers receive advance notification one month before any promotional rate expires, allowing ample time to decide whether to continue service at the standard rate or explore other options.

Customers interested in promotional offers should contact Aether Wireless customer service or check the promotions portal to view currently available deals. Not all promotions are combinable, and the system will automatically apply the most favorable combination when multiple eligible promotions exist on an account. The maximum of two discounts per account ensures that promotional offers remain sustainable while still providing meaningful savings to families.

Data Sharing Add-On

For Family Plans requiring additional flexibility beyond the standard 100GB shared allowance, Aether Wireless offers a Data Sharing Add-On at \$10 per month. This add-on does not increase the shared data pool but instead provides each line on the account with access to a personal high-speed data reserve of 5GB that can be used when the shared pool is exhausted. The personal reserve is allocated separately per line, meaning one line's usage does not impact another's reserve.

The Data Sharing Add-On is particularly useful for families where certain members have consistently higher data demands than others, such as teenagers streaming content or remote workers requiring reliable connectivity. The add-on is billed monthly and remains active until removed; customers may add or remove the Data Sharing Add-On at any time with changes taking effect at the start of the next billing cycle.

Frequently Asked Questions

Can we add lines to our Family Plan at any time?

Yes, additional lines can be added to an existing Family Plan at any time by contacting customer service or visiting a retail location. Each additional line costs \$30 per month and will be immediately eligible for the shared data pool and all plan features.

What happens if we exceed our 100GB shared data allowance?

All lines on the account will be throttled to 256kbps speeds for the remainder of the billing cycle. This speed is adequate for basic tasks like email and web browsing but will not support high-quality video streaming or large file downloads.

Can we keep our Family Plan if we no longer have two lines?

The Family Plan requires a minimum of two active lines. If you reduce to a single line, the account will need to be migrated to an individual plan, and pricing will be adjusted accordingly.

Business Plans

Overview and Pricing

The Aether Wireless Business Plan is engineered for organizations requiring centralized management, pooled resources, and scalable connectivity across multiple employees or team members. The base Business Plan provides 200GB of pooled data per month and includes service for five lines at a base price of \$200 per billing cycle. This pooled model allows businesses to allocate data resources dynamically across their team, with heavy data users balanced by colleagues with lighter consumption patterns.

Additional lines beyond the initial five can be added at a cost of \$40 per line per month. For organizations with larger workforces, this scalable structure accommodates growth without requiring complex account restructuring. A business with ten lines, for example, would pay \$200 plus \$200 (\$40 multiplied by five additional lines) for a total of \$400 per month, with all ten lines sharing the 200GB data pool.

Data Allowance and Overage Behavior

Business Plans include 200GB of pooled high-speed data each billing cycle, distributed across all active lines on the account. Unlike individual plans where each subscriber has a personal allowance, the Business Plan pool is managed at the account level, giving administrators flexibility in how resources are allocated. When the combined usage across all lines approaches or reaches the 200GB threshold, the account transitions to throttled speeds rather than accumulating overage charges.

The throttled speed for Business Plans is set at 1Mbps, which represents the highest throttle speed across all Aether Wireless plan categories. This elevated throttle speed reflects the business-oriented nature of the plan, recognizing that business customers may need continued access to email, cloud applications, and basic web-based tools even after exhausting their high-speed allowance. The 1Mbps speed supports video conferencing at lower resolutions, cloud document editing, and most business applications, though it may present limitations for large file transfers or high-definition video streaming.

Features Matrix

The Business Plan includes an enhanced feature set tailored to professional communication needs, with priority handling across Aether Wireless network infrastructure.

Feature	Availability
Unlimited Talk	Included
Unlimited Text (SMS/MMS)	Included
Mobile Hotspot	Included (pooled data allowance)
International Calling	Included to select countries
Wi-Fi Calling	Included
Priority Network Access	Included (enhanced priority)
Visual Voicemail	Included
Call Forwarding	Included
Spam Blocking	Included

The enhanced priority network access for Business Plans places business traffic ahead of consumer traffic during periods of network congestion, helping to ensure consistent connectivity for business-critical applications. Mobile hotspot functionality is included, allowing employees to use their business lines as connectivity sources for laptops and other devices, with all hotspot usage counting against the pooled 200GB allowance.

Change Policies

Business Plan modifications follow the standard Aether Wireless change policies with considerations for the operational needs of business customers. Downgrades to a lower-tier plan take effect at the start of the next billing cycle, providing continuity for ongoing business operations during the transition. Upgrades to a higher-tier plan take effect immediately with prorated billing, ensuring businesses can access additional resources without delay when operational demands increase.

The 14-day cooling-off period applies to all Business Plan changes, allowing administrators to reassess their decisions if the new plan configuration does not align with actual business needs. Device installment agreements remain unaffected by plan changes; businesses continuing to pay for devices under installment terms will maintain those payment obligations regardless of plan modifications. This separation ensures that equipment financing remains stable even as service requirements evolve.

Promotional Pricing

Promotional pricing for Business Plans is applied on a per-account basis, with each business account eligible to receive up to two promotional discounts simultaneously. Available promotions may include reduced monthly rates for the first twelve months, waived line activation fees, or bonus data allocations. All promotional pricing includes a 30-day expiry notice, ensuring businesses have advance warning before promotional rates conclude.

Business customers should work with their Aether Wireless business account representative or contact business customer service to identify available promotions and determine eligibility. Promotions may have specific requirements, such as minimum line counts or commitment periods, and not all promotions can be combined. The system applies the optimal combination of eligible promotions automatically.

Frequently Asked Questions

Can we monitor data usage by individual line on our Business Plan?

Yes, business account administrators can access detailed usage reporting through the Aether Wireless business portal, which provides per-line breakdowns of voice, text, and data consumption. This visibility helps administrators manage the pooled resource effectively and identify any lines with unusually high usage patterns.

What is the difference between standard priority and enhanced priority on Business Plans?

Enhanced priority network access places business traffic ahead of both standard priority and non-priority traffic during periods of network congestion. This ensures that business-critical communications maintain reliability even when the network is heavily loaded, such as in crowded venues or during emergency situations.

Can we add international roaming to our Business Plan lines?

International calling to select countries is included in the Business Plan. For countries not included in the standard international calling package, businesses can add international roaming add-ons. Contact business customer service for specific country coverage and pricing.

What happens if we need more than 200GB of pooled data?

If a business consistently requires more than 200GB, upgrading to a higher-tier business plan provides additional pooled data. For one-time or occasional spikes, businesses may also consider the data sharing add-on options available through their account representative.

Senior Plans (65+)

Overview and Pricing

The Aether Wireless Senior Plan is specifically designed for customers aged 65 and older, offering an affordable entry point into postpaid wireless service with all the essential features needed for everyday communication. The Senior Plan provides 10GB of high-speed data per month at a base price of \$30 per billing cycle. This plan strikes a balance between comprehensive service and budget-conscious pricing, recognizing that many seniors have distinct communication patterns focused on voice calls, text messaging, and moderate data usage for web browsing, email, and applications.

Eligibility for the Senior Plan requires verification of age 65 or older at the time of account creation or plan enrollment

Data Allowances and Overage Behavior

Plan-Specific Data Allowances and Throttling

Aether Wireless postpaid plans include specific data allowances with defined throttling behavior once the included data is exhausted. The throttling speeds and policies vary by plan tier to optimize network resources and provide appropriate service levels for different customer segments.

Essential Plan (5GB)

- Data Allowance: 5GB high-speed data per billing cycle
- Overage Behavior: Throttled to 128kbps until next billing cycle
- Applies to: Essential plan subscribers

Standard Plan (20GB)

- Data Allowance: 20GB high-speed data per billing cycle
- Overage Behavior: Throttled to 256kbps until next billing cycle
- Applies to: Standard plan subscribers

Premium Plan (50GB)

- Data Allowance: 50GB high-speed data per billing cycle
- Overage Behavior: Throttled to 512kbps until next billing cycle
- Applies to: Premium plan subscribers

Family Plan (100GB Shared)

- Data Allowance: 100GB shared high-speed data across all lines
- Overage Behavior: Throttled to 256kbps until next billing cycle
- Applies to: All lines on Family plan account

Unlimited Plan

- Data Allowance: Unlimited high-speed data
- Overage Behavior: Network deprioritization during peak usage periods
- Throttling: No speed reduction, but data may be prioritized below other plans during network congestion

Business Plan (200GB Pooled)

- Data Allowance: 200GB pooled high-speed data across 5 lines
- Overage Behavior: Throttled to 1Mbps until next billing cycle

- Additional Lines: +\$40/line with proportional data allocation
- Applies to: All lines on Business plan account

Senior Plan (10GB)

- Data Allowance: 10GB high-speed data per billing cycle
- Overage Behavior: Throttled to 128kbps until next billing cycle
- Eligibility: Available to customers aged 65 and older

Data Reset and Billing Cycle

All plan data allowances reset on the customer's billing cycle date. Throttled data speeds are automatically restored when the new billing cycle begins, regardless of whether the customer has reached their data limit.

Features Matrix

Core Plan Features Comparison

The following matrix outlines the standard features included with each Aether Wireless postpaid plan. All plans include basic voice and text capabilities as specified in each plan description.

Feature	Essential	Standard	Premium	Family	Unlimited	Business	Senior
Talk Minutes	500	1,000	Unlimited	Shared	Unlimited	Shared	Included
Text Messages	500	1,000	Unlimited	Shared	Unlimited	Shared	Included
Data Hotspot	Not Included	Included	Included	Included	Included	Included	Not Included
International Calling	Add-on Available	Add-on Available	Add-on Available	Add-on Available	Add-on Available	Included	Add-on Available
Wi-Fi Calling	Included	Included	Included	Included	Included	Included	Included
Priority Network Access	Not Included	Not Included	Included	Not Included	Not Included	Included	Not Included
Voicemail	Included	Included	Included	Included	Included	Included	Included

Feature Details

Talk Minutes and Text Messages

- Essential and Standard plans include specific minute and text allocations as listed
- Premium, Unlimited, and Senior plans include unlimited domestic talk and text
- Family and Business plans share allocated minutes and texts across all lines on the account

Data Hotspot

- Available on Standard, Premium, Family, Unlimited, and Business plans

- Uses included data allowance from the plan
- Not available on Essential and Senior plans

International Calling

- Available as an add-on service for most plans
- Included with Business plans
- Pricing and destination coverage vary by add-on selection

Wi-Fi Calling

- Standard feature across all plans
- Enables calls over Wi-Fi networks when cellular coverage is limited
- Compatible with most Wi-Fi calling-enabled devices

Priority Network Access

- Available exclusively on Premium and Business plans
- Provides enhanced network performance during peak usage periods
- Priority handling for data traffic and network resources

Voicemail, Call Forwarding, and Spam Blocking

- Included at no additional cost on all plans
- Spam blocking provides protection against unwanted robocalls and spam texts
- Call forwarding allows redirection of incoming calls to another number

Plan Change Policies

Plan Upgrade Procedures

Customers may upgrade their postpaid plan at any time during their billing cycle. Upgrades take effect immediately upon request and include prorated billing adjustments. The customer will be charged the prorated difference between their current plan and the new plan for the remaining days in the current billing cycle. The full new plan rate will apply beginning with the next billing cycle.

Plan Downgrade Procedures

Plan downgrades take effect at the beginning of the next billing cycle. Customers requesting downgrades will continue on their current plan through the end of the current billing cycle. The new, lower plan rate will be charged starting with the next billing cycle date. No prorated credits are provided for downgrades requested mid-cycle.

Cooling-Off Period

A 14-day cooling-off period applies to all plan changes. Once a customer changes plans (either upgrade or downgrade), they must wait 14 days before making another plan change. This policy prevents frequent plan switching and ensures stable billing cycles. The cooling-off period begins from the date the plan change takes effect.

Device Installment Agreements

Plan changes do not affect existing device installment agreements. Customers continue to pay their device installment amounts as scheduled regardless of plan changes. The device payment appears as a separate line item on the monthly bill and is not impacted by plan upgrades, downgrades, or the 14-day cooling-off period.

Promotional Pricing and Discounts

Promotional pricing is applied per account and limited to a maximum of two discounts per account. Customers must meet all promotional eligibility requirements at the time of enrollment. Promotional discounts expire 30 days after the customer receives written notice of the expiration date. Notice is provided via email to the primary account holder's email address on file.

Data Sharing Add-On

Customers on eligible plans may add data sharing capabilities for \$10 per month. This add-on enables data sharing between lines on Family and Business plans, or allows hotspot functionality on plans that don't include it. The data sharing add-on is billed monthly and can be added or removed at any time with changes taking effect on the next billing cycle.

Travel Add-On Information

International travel add-ons are available for \$15 per day and provide international data, talk, and text while traveling abroad. The travel add-on covers most international destinations and activates automatically when the customer uses their device in an international location. Customers can enable or disable the travel add-on through their account management portal or by contacting customer service. The daily rate applies only on days when the customer uses their device internationally.

Promotional Pricing Rules

Promotional pricing on Aether Wireless postpaid plans is available to eligible customers and is subject to the following terms and conditions. All promotional offers are applied on a per-account basis, meaning that each customer account is limited to promotional pricing as specified in the individual offer. Promotional discounts cannot be combined across multiple promotions unless explicitly stated in the specific promotional terms.

Customers may apply a maximum of two promotional discounts to their account at any given time. This limit applies to all active promotions, including those offering percentage-based discounts, dollar-amount credits, or bundled services. If a customer attempts to add a third promotional discount, the system will reject the request and the customer will be required to remove an existing promotion before applying a new one. The two-discount maximum is strictly enforced at the account level and cannot be overridden by customer service representatives.

When a promotional pricing period is approaching its expiration, Aether Wireless will provide advance notice to the affected customer. A minimum notice period of 30 days will be provided prior to the expiration of any promotional pricing. This notice will be delivered via the customer's preferred communication method on file, which may include SMS message, email, or through the Aether Wireless mobile application. The expiration notice will clearly state the date on which the promotional pricing will end, the standard rate that will apply thereafter, and options available to the customer such as renewing the promotion if eligible or selecting an alternative plan.

Upon expiration of promotional pricing, the customer's account will automatically convert to the standard rate for their selected plan. The customer will be notified of the new billing amount in their next billing statement. Customers who wish to maintain promotional pricing beyond the expiration date should contact customer service to inquire about available renewal options, though renewal is not guaranteed and is subject to the promotional

terms in effect at the time of renewal request.

Data Sharing Add-on

The Data Sharing Add-on allows Aether Wireless customers to share data allowances across multiple lines on a single account. This feature is designed for families, households, or business customers who want flexibility in how they allocate their monthly data resources among various users.

The Data Sharing Add-on is available at a rate of \$10 per month. This monthly fee provides the account holder with the ability to allocate data from a shared pool to any active line on the account. The data pool is drawn from the primary account's data allowance, whether that allowance is from an individual plan or a shared family or business plan structure.

When the Data Sharing Add-on is active, the account administrator can monitor usage across all lines through the Aether Wireless online portal or mobile application. Data consumption is tracked in real-time, and administrators can set alerts for individual lines to prevent unexpected depletion of the shared data pool. Unused data from the shared pool does not roll over to the following billing cycle and will be lost at the end of each month.

The Data Sharing Add-on can be added to any active postpaid account at any time during the billing cycle. The \$10 monthly charge will be prorated based on the number of days remaining in the current billing cycle at the time of activation. Customers may remove the Data Sharing Add-on at any time, though the removal will take effect at the start of the next billing cycle. The add-on is not available on prepaid plans or legacy plans that do not support data sharing functionality.

Travel Add-on (FAQ)

What is the Travel Add-on and what does it include?

The Travel Add-on is an optional add-on service designed for customers who need mobile data, voice, and text services while traveling outside of their home coverage area. When activated, the add-on provides full access to Aether Wireless domestic and international roaming networks, allowing customers to use their existing plan's allowances while traveling abroad. The add-on applies to the customer's primary line and any additional lines on the account that require international connectivity.

How much does the Travel Add-on cost?

The Travel Add-on is priced at \$15 per day. This daily rate is charged for each day that the add-on is active, regardless of the amount of data or usage consumed during that day. The charge applies to each line on which the add-on is activated. For example, if a customer activates the Travel Add-on on their primary line for a 7-day international trip, the total charge will be \$105 for that billing cycle.

How do I activate the Travel Add-on before traveling?

Customers can activate the Travel Add-on through several convenient methods. The recommended option is to use the Aether Wireless mobile application, which allows for immediate activation and deactivation of the add-on. Customers may also activate the add-on by logging into their account on the Aether Wireless website or by contacting customer service directly. Activation can be completed in advance of travel, and customers are encouraged to activate the add-on at least 24 hours before departing to ensure seamless connectivity upon arrival at their destination.

Can I use the Travel Add-on for international travel?

Yes, the Travel Add-on provides international roaming capabilities in over 200 countries and territories worldwide. The specific countries and territories included in the roaming coverage may vary, and customers should verify their destination is supported before traveling. The add-on provides access to partner networks in international locations, and network availability may vary by region. Voice calls, text messages, and data services are all supported through the Travel Add-on while traveling internationally.

What happens to my plan's data allowance when using the Travel Add-on?

When the Travel Add-on is active, customers continue to use the data, voice, and text allowances included in their existing postpaid plan. There are no separate roaming-specific allowances; instead, the add-on simply enables access to these services while outside the home coverage area. Customers should monitor their usage carefully while traveling, as international roaming may consume data more quickly depending on network conditions and the applications in use. Once the plan's data allowance is exhausted, standard overage rates or throttling rules will apply based on the customer's specific plan tier.

Can I deactivate the Travel Add-on during my trip if I no longer need it?

Yes, customers may deactivate the Travel Add-on at any time through the Aether Wireless mobile application or website. The deactivation will take effect at the end of the current calendar day, meaning if the add-on is deactivated in the morning, the customer will still have coverage for the remainder of that day. The \$15 daily charge will continue to apply for any day on which the add-on was active at any point. For this reason, customers should plan their activation and deactivation dates carefully to avoid unnecessary charges.

Q: What happens if I exceed my data allowance?

A: Your data speeds will be reduced based on your plan. Essential and Senior plans throttle to 128kbps, Standard and Family plans to 256kbps, Premium to 512kbps, and Business to 1Mbps. Unlimited plan customers may experience deprioritization during network congestion.

Q: Can I change my plan at any time?

A: Yes. Plan upgrades take effect immediately with prorated charges, while downgrades apply at the start of the next billing cycle. A 14-day cooling-off period is available for plan changes, and changing your plan will not affect your device installment agreements.

Q: How do promotional discounts work?

A: Promotional pricing is applied per account, with a maximum of 2 discounts allowed. You will receive a 30-day notice before any promotional pricing expires.

Q: Can I share data with other lines on my account?

A: Yes. A data sharing add-on is available for \$10 per month, allowing you to share your data allowance across additional lines.

Q: What is the cost for international travel add-on?

A: The travel add-on costs \$15 per day and provides coverage while traveling internationally.

Q: What are the available plan options and their prices?

A: Aether Wireless offers Essential (\$40 for 5GB/500min/500SMS), Standard (\$60 for 20GB/1000min/1000SMS), Premium (\$80 for 50GB/unlimited), Family (\$120 for 2 lines with 100GB shared, +\$30 per additional line), Unlimited (\$90), Business (\$200 for 5 lines with 200GB pooled, +\$40 per additional line), and Senior 65+ (\$30 for 10GB).

Q: What features are included with postpaid plans?

A: All postpaid plans include talk, text, hotspot capabilities, international calling, Wi-Fi calling, priority network access, voicemail, call forwarding, and spam blocking.
