International Roaming Policy

Category B — Policy & Process Knowledge Base

Document ID	AW-ROM-002
Version	1.2
Last Updated	August 2026
Department	Carrier Services
Company	Aether Wireless
Classification	Internal — Training & Reference

Overview

Aether Wireless provides international roaming services across 180+ countries, enabling customers to stay connected while traveling abroad. This policy outlines roaming passes, pay-per-use rates, coverage areas, activation procedures, data management features, and troubleshooting guidance for international roaming services.

Roaming Passes

Customers can purchase international roaming passes for cost-effective data and calling while traveling. All passes include US calling unless otherwise specified.

Pass Type	Duration	Price	Data Included	US Calling	Best For
Day Pass	24 hours	\$15	500 MB	Included	Short trips (1-3 days)
Weekly Pass	7 days	\$50	3 GB	Included	Week-long travel
Monthly Pass	30 days	\$120	10 GB	Included	Extended trips
Cruise Pass	Per day	\$10	200 MB	Not included	Cruise ship travel

Pass Features

- Passes activate upon first use in a supported country
- Unused data does not roll over between passes
- Passes automatically renew at the same rate if data is exhausted and auto-purchase is enabled
- US calling included with Day, Weekly, and Monthly passes (except Cruise Pass)

Pay-Per-Use Rates

Without an active roaming pass, the following pay-per-use rates apply:

Service	Rate	Notes
Data	\$2.00/MB	Billed in 1 KB increments
Calls Received	\$1.50/minute	Charged per minute
Calls Made	\$2.00/minute	Charged per minute to US/international
SMS Sent	\$0.50/message	Standard text messages
SMS Received	Free	No charge for incoming texts
MMS	\$1.00/message	Picture/video messages

Coverage Regions

Aether Wireless roaming is available in 180+ countries across six major regions:

Region	Countries Included	Popular Destinations
North America	3+	Canada, Mexico
Europe	35+	UK, France, Germany, Italy, Spain
Asia-Pacific	25+	Japan, South Korea, Australia, Singapore
Latin America	20+	Brazil, Argentina, Chile
Africa	15+	South Africa, Egypt, Morocco
Middle East	10+	UAE, Saudi Arabia, Israel

Coverage Verification

- Check coverage availability at aetherwireless.com/coverage before traveling
- Network partners vary by country and may affect service quality
- 5G roaming available in select countries (marked in coverage map)

Activation Steps

International roaming is disabled by default for security. Activate through one of these methods:

Via Aether Mobile App

1. Open the Aether app
2. Navigate to Services → International Roaming
3. Select your destination country/region
4. Choose a roaming pass or pay-per-use
5. Confirm activation

Via Website

1. Visit aetherwireless.com/roaming
2. Log in to your account
3. Select International Roaming

4. Choose your travel destination
5. Select a pass or pay-per-use option
6. Complete activation

Via Phone

1. Call 1-833-AETHER-INTL (1-833-284-3746)
2. Verify account with PIN or security questions
3. Provide destination country
4. Select roaming option
5. Receive confirmation SMS

Activation Timeline

- App/Web: Immediate activation
- Phone: Within 15 minutes during business hours (8 AM - 8 PM ET)
- After-hours phone activation: Processed within 2 hours

Data Management While Roaming

Usage Notifications

Automatic alerts sent at:

- 50% of data limit reached
- 80% of data limit reached
- 100% of data limit reached

Auto-Purchase Feature

- Automatically purchases additional Day Pass when data limit is reached
- Enabled by default for Day Pass customers
- Can be disabled in app settings
- Customer receives SMS confirmation before each auto-purchase

Data Saver Mode

- Reduces data consumption by compressing images and videos
- Available in app settings under Roaming → Data Saver
- Can decrease data usage by up to 60%
- Automatically disabled when returning to US

Roaming Limits

- Set custom data limits in the app
- Options: \$50, \$100, \$250, or Unlimited
- Receive alerts when approaching limits

- Service temporarily suspended at limit (can be overridden)

Troubleshooting

Issue	Possible Causes	Solutions
No Service	Network partner unavailable, SIM card issue, roaming not activated	Check coverage map, restart device, verify roaming is enabled, contact support
Cannot Make/Receive Calls	Network compatibility, call barring enabled, insufficient balance	Check network settings, disable call barring, verify account status, try Wi-Fi calling
Slow Data Speeds	Network congestion, data limit reached, throttling	Check data usage, switch to 3G/4G manually, enable data saver, contact support if persistent
Unexpected Charges	Pay-per-use rates applied, auto-purchase occurred, background data usage	Review usage in app, check pass status, disable auto-purchase, enable data saver, contact billing support

Common Solutions

1. **Restart your device** after activating roaming
2. **Toggle Airplane Mode** on/off to reconnect to network
3. **Manually select network** in device settings if auto-selection fails
4. **Enable Wi-Fi calling** when available to reduce roaming charges
5. **Monitor data usage** regularly through the app

FAQs

Q: Can I use my existing plan's domestic data while roaming?

A: No, domestic plan data does not apply internationally. You must purchase a roaming pass or use pay-per-use rates.

Q: What happens if I exceed my roaming pass data limit?

A: If auto-purchase is enabled, an additional Day Pass will be automatically purchased. Otherwise, data speeds may be reduced or service suspended until you purchase another pass.

Q: Are there any countries where roaming is not available?

A: Roaming is not available in Cuba, Iran, North Korea, and Syria due to US sanctions. Check our coverage map for the most current list.

Q: How do I cancel my roaming pass early?

A: You cannot cancel a pass once activated, but you can disable auto-renewal to prevent automatic purchases. Remaining data will be forfeited.

Q: Can I share my roaming pass with other devices?

A: No, roaming passes are tied to a single line and device. Each line requires its own roaming pass or pay-per-use option.

Q: What is the difference between data roaming and Wi-Fi calling while abroad?

A: Data roaming uses cellular networks internationally and consumes your roaming data. Wi-Fi calling uses internet connections and typically does not consume roaming data, though international calling rates may still apply.

For additional support, contact International Roaming Support at 1-833-AETHER-INTL or visit aetherwireless.com/support.
