International Roaming Policy

Category B — Policy & Process Knowledge Base

Document ID	AW-SRV-004
Version	1.2
Last Updated	August 2026
Department	Carrier Services
Company	Aether Wireless
Classification	Internal — Training & Reference

Overview

This policy governs international roaming services for Aether Wireless customers traveling outside the United States. It defines roaming passes, pay-per-use rates, coverage regions, activation procedures, data management options, and troubleshooting steps. All roaming services are disabled by default and must be explicitly enabled by the customer before use. This document applies to all individual and business account customers on rate plans that support international roaming.

Section 1: Roaming Passes

Aether Wireless offers four roaming passes for international travel. Passes are available for purchase through the Aether mobile app, the customer portal, or by calling 1-833-AETHER-INTL. Passes activate immediately upon purchase.

Pass Options and Inclusions

Pass Type	Cost	Data Allowance	Additional Inclusions
Day Pass	\$15/day	500 MB high-speed	None
Weekly Pass	\$50/week	3 GB high-speed	None
Monthly Pass	\$120/month	10 GB high-speed	Unlimited in-country calls within visited country, Unlimited calls to/from the US
Cruise Pass	\$10/day	200 MB high-speed	None

Pass Terms

- Day Passes and Cruise Passes are billed per calendar day (12:00 AM – 11:59 PM local time at the destination).
- Weekly Passes are billed every 7 consecutive days from activation.
- Monthly Passes are billed every 30 consecutive days from activation.
- Unused data does not roll over to the next billing period or day.

- Passes renew automatically unless the customer disables auto-renewal or reaches the plan's maximum duration limit.
- The Cruise Pass is designed for maritime travel and limited cellular connectivity zones.

Section 2: Pay-Per-Use Rates

Customers who do not purchase a roaming pass will be charged the following pay-per-use rates for international roaming services:

Service	Rate
Data (per MB)	\$2.00
Calls received (per minute)	\$1.50
Calls made (per minute)	\$2.00
SMS sent (per message)	\$0.50
SMS received	Free
MMS sent or received (per message)	\$1.00

Pay-Per-Use Terms

- Pay-per-use rates apply from the moment roaming is enabled and are calculated in real-time increments.
- Data is billed in 1 KB increments.
- Voice calls are billed in 1-minute increments, with a 1-minute minimum per call.
- MMS is billed per message regardless of size, up to the carrier-imposed maximum of 300 KB per message.

Section 3: Coverage Regions and Network Partners

Aether Wireless provides roaming coverage through regional partner networks in over 180 countries. Service availability, speeds, and network technology vary by country and partner.

Coverage by Region

Region	Network Partners
North America	Rogers (Canada), Telcel (Mexico), Bell (Canada)
Europe	Vodafone, Orange, Deutsche Telekom
Asia-Pacific	SoftBank (Japan), Singtel (Singapore), Optus (Australia)
Latin America	Claro, Entel, Movistar
Africa	MTN, Vodacom, Safaricom
Middle East	Etisalat, STC, Zain

Coverage Notes

- Not all countries within a region may have partner coverage in every location. Rural and remote areas may have limited or no service.
- Network technology (4G LTE, 5G) depends on the partner network's infrastructure in each country.

- Some partner networks may throttle speeds during periods of high congestion, which may affect data-intensive activities like video streaming.
 - Voice and SMS services are available in all covered countries. Data services are available in most covered countries; verify availability in the Aether app before travel.
-

Section 4: Roaming Activation

Activation Methods

Roaming is disabled by default on all Aether Wireless accounts. Customers may enable international roaming through any of the following methods:

1. **Aether Mobile App:** Navigate to Account > Roaming > Enable International Roaming
2. **Customer Portal:** Log in at aetherwireless.com > My Account > Roaming Settings
3. **Phone Support:** Call 1-833-AETHER-INTL (1-833-228-4347)

Activation Timing

- Roaming activation is instant upon confirmation. No device restart is required.
- Customers should enable roaming before departing the United States or immediately upon arrival at the destination.
- If roaming was not enabled before departure, it can be enabled remotely via the app or portal while in the destination country, provided the device has WiFi connectivity or temporary cellular service.

Device Requirements

- The device must be unlocked or locked to Aether Wireless.
 - The device must support the frequency bands used by partner networks in the destination country.
 - eSIM-capable devices can activate roaming on eSIM profiles without visiting a retail location.
-

Section 5: Data Management

Usage Notifications

Aether Wireless sends automated data usage notifications at the following thresholds:

- **50% of allowance used:** First notification sent via SMS and push notification
- **80% of allowance used:** Second notification warning that limit is approaching
- **100% of allowance used:** Final notification informing the customer the data limit has been reached

Auto-Purchase Feature

Customers may opt into auto-purchase of an additional Day Pass (\$15) when their data allowance reaches 100%. This feature:

- Is disabled by default and must be enabled in the app or portal
- Triggers one automatic Day Pass purchase per billing cycle
- Can be disabled at any time

- Sends a confirmation SMS before executing the auto-purchase

Data Roaming Limits

Customers can set a personal data roaming limit to prevent unexpected charges:

- Set a hard cap (e.g., \$50, \$100, or custom amount)
- When the limit is reached, data roaming is automatically paused
- Customers can increase or remove the limit at any time via the app or portal

Data Saver Mode

Data Saver Mode reduces data consumption while roaming by:

- Compressing images and web content
- Restricting background app data usage
- Blocking auto-play videos
- Can be enabled or disabled in the Aether app under Settings > Data Usage

Section 6: Troubleshooting

Common Issues and Resolutions

No Service After Arrival

- Verify Airplane Mode is turned OFF.
- Wait 5 minutes for the device to search for and register on a partner network.
- If no service after 5 minutes, manually select a network from the available partner list in device settings.

Roaming Pass Not Applied

- Confirm the roaming pass was purchased and the confirmation number received.
- Verify roaming is enabled in Account > Roaming settings.
- Restart the device or toggle Airplane Mode on for 30 seconds, then off again.
- If the pass still does not apply, call 1-833-AETHER-INTL for assistance.

Slow Data Speeds

- Check that the data roaming limit has not been reached.
- Move to a location with stronger signal strength.
- Disconnect and reconnect to the network.
- If congestion is suspected, try again during off-peak hours (typically early morning local time).

Unable to Make or Receive Calls

- Confirm international roaming is enabled.
- Verify the device is registered on a partner network (check signal indicator).
- Check that the phone number is not blocked or restricted.
- For outbound call issues, ensure the correct international dialing format is used (011 + country code + local number).

FAQs

Q: Can I use my phone in any country with Aether Wireless roaming?

A: Aether Wireless offers roaming in over 180 countries through regional partner networks. Coverage is available in North America, Europe, Asia-Pacific, Latin America, Africa, and the Middle East. Not all countries or locations within a region may be covered. Check the Aether app for specific country availability before travel.

Q: What happens if I exceed my roaming pass data limit?

A: If you exceed your data limit, data services will be suspended until you purchase an additional pass or your pass auto-renews (if enabled). You can purchase another Day Pass (\$15), upgrade to a higher-tier pass, or wait for the current pass period to end. Voice and SMS services remain functional unless you have a pay-per-use balance due.

Q: Is it cheaper to use pay-per-use rates or buy a roaming pass?

A: For most travelers, a roaming pass is significantly more cost-effective than pay-per-use rates. For example, using 500 MB of data at pay-per-use rates would cost \$1,000, compared to \$15 for a Day Pass. If you only need minimal connectivity (less than 100 MB and occasional SMS), pay-per-use may be suitable, but passes are recommended for any substantial usage.

Q: Can I use my existing domestic data allowance while roaming?

A: No. Domestic data allowances from your US rate plan do not apply internationally. You must purchase a roaming pass or use pay-per-use rates to access data while abroad. The Monthly Pass includes unlimited in-country calls and US calls, but data is separate from any domestic allowance.

Q: How do I disable roaming to avoid accidental charges?

A: You can disable roaming at any time through the Aether mobile app (Account > Roaming > Disable), the customer portal, or by calling 1-833-AETHER-INTL. Disabling roaming stops all roaming charges immediately. Note that any active pass will remain valid until its expiration, but no new roaming services will be available.

Q: Can I use tethering or mobile hotspot while roaming?

A: Yes, tethering and mobile hotspot are supported while roaming, but the data used counts toward your roaming pass allowance. For example, if you have a Day Pass with 500 MB and use 200 MB for tethering, you will have 300 MB remaining for all other data usage on your device.

For assistance with international roaming, contact 1-833-AETHER-INTL (1-833-228-4347) or visit aetherwireless.com/roaming.
